Weronika Ciężak

Lublin, Poland | +48 533 570 307 | weronikaciezak@wp.pl | linkedin | github | weronikaciezak.dev

Summary

Software Engineer with hands-on experience in **full-stack development**, **containerization**, and automating **CI/CD pipelines**. Solid foundation in **data structures and algorithms**, implemented in C++. Focused on writing clean, high-performance code while leveraging CI/CD tools to streamline delivery processes.

Education

Maria Curie-Skłodowska University — Lublin, Poland
Bachelor's degree in ***Computer Science*** — *Oct. 2022 – Jul. 2025*

Maria Curie-Skłodowska University — Lublin, Poland
Master's degree in ***Computer Science*** — *Oct. 2025 – present*

Experience

Nowanet — July 2024 – July 2024
Technical Trainee — *Bychawa, Poland*

- Installed and activated **fiber optic internet** connections at customer premises.
- Configured and troubleshot network equipment, including **switches, routers, and TV decoders**.
- Set up structured network cabling, including **RJ45 termination** and cable testing.
- Installed and set up **wireless antennas** to provide reliable connections.

Projects

Statify | *Python, TypeScript, Django, React, Spotify API, LastFM API*

- Bulit in a **3-person team** a full-stack music analytics application built with a **React and TypeScript frontend** using **Vite**, and a **Django backend** integrated with the **Spotify and Last.fm APIs**.
- Implemented features for exploring top and recently played tracks, artists, playlists, music statistics, genre visualizations, and personalized music collages.
- **Containerized** the frontend and backend with **Docker and Docker Compose**, with persistent data storage managed through Django models and migrations.

Bookstore | *Java, Spring Boot, PostgreSQL*

- Web application for managing and displaying a bookstore, using **Spring Boot** (JDK 17, Maven).
- Implemented CRUD operations along with user authentication and authorization.
- Designed the data layer with **Spring Data JPA** and **Hibernate** on a **PostgreSQL** database.
- Containerized the application with **Docker** and **Docker Compose**.

Simple To-Do | *JavaScript, Express, PostgreSQL, Jenkins, Docker*

- Full-stack to-do application with a **Node.js/Express backend**, a **PostgreSQL database**, and a **frontend** in **HTML5, CSS3**, and vanilla **JavaScript** (fetch API).
- **Containerized** the application and database with **Docker and Docker Compose**.
- Set up a **Jenkins CI/CD pipeline** that automatically deploys the application on every commit.

Certifications

Test of English C1 (Listening, Reading) | *LanguageCert* — Mar 2026

Languages

Polish (Native), English (C1)

Technical Skills

Programming Languages: C++, C, Python, Java, Kotlin, SQL, Typescript, Javascript, HTML/CSS, Assembly.
Frameworks & Libraries: Spring Boot, React, Django, Jetpack Compose.
Tools & DevOps: Docker, Jenkins, CI/CD, Git, Linux, Bash, PostgreSQL, MongoDB, AWS.
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer & Network Security, Probability & Statistics, Computer System Architecture, Software Engineering, Discrete Mathematics, Machine Learning, Cryptography, Embedded Systems.
